TECHNICAL BULLETIN

GLEAMY POWDER

GLEAMY POWDER is a user friendly, highly effective polishing powder for marble polishing, restoration and maintenance of worn, calcium-based, polished marble, limestone, terrazzo, and travertine stone

USES:

Recommended for use on polished marble, terrazzo and agglomerate surfaces with a floor machine

COVERAGE:

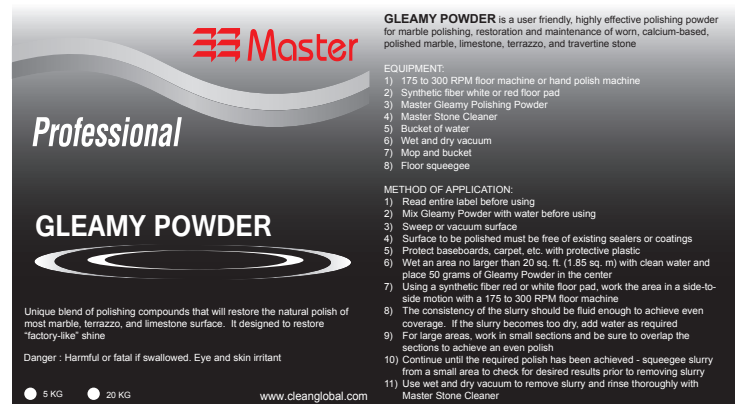

Approximately 600 to 1,000 ft² (55 m² to 93 m²) per 1 kg depending on surface condition and method of application

METHOD OF APPLICATION:

1. **Read entire label before using**
2. Mix Gleamy Powder with water before using
3. Sweep or vacuum surface
4. Surface to be polished must be free of existing sealers or coatings
5. Protect baseboards, carpet, etc. with protective plastic
6. Wet an area no larger than 20 ft² (1.85 m²) with clean water and place 50 grams of Gleamy Powder in the center
7. Using a synthetic fiber red or white floor pad, work the area in a side-to-side motion with a 175 to 300 RPM floor machine
8. The consistency of the slurry should be fluid enough to achieve even coverage. If the slurry becomes too dry, add water as required
9. For large areas, work in small sections and be sure to overlap the sections to achieve an even polish
10. Continue until the required polish has been achieved - squeegee slurry from a small area to check for desired results prior to removing slurry
11. Use wet and dry vacuum to remove slurry and rinse thoroughly with Master Stone Cleaner

MAINTENANCE:

Master Stone Re-polish is recommended as a routine spray and buff chemical, especially on commercial or high-traffic floors. Master Stone Cleaner is recommended for daily maintenance

LIMITATIONS:

Not designed for polished granite, severely damaged polished marble or terrazzo. Severely damaged polished stone or stone installed withlippage may require professional re-grinding

HANDLING AND STORAGE:

- Harmful if swallowed
- Avoid contact with eyes
- Close container after each use
- Store in original container only
- Store in dry area

CAUTION:

- **KEEP OUT OF REACH OF CHILDREN**
- **Do not take internally**
- **IF INGESTED:** Give large quantities of water to drink and induce vomiting. Repeat at least once and then administer milk of magnesia as an emollient. Seek medical attention at once
- **IF INHALED:** Move to fresh air. If discomfort persists, seek medical attention
- **EYE CONTACT:** Flush with water for at least 15 minutes. If irritation persists, seek immediate medical attention
- **SKIN CONTACT:** Wash with soap and water, rinse thoroughly. If irritation persists, seek medical attention. If prolonged use of product, wear rubber gloves.
